

Deeploy - Shaping AI for a better future

About Deeploy

Deeploy is a leading AI and technology company committed to making AI explainable, accountable, and responsible. Founded in 2020, Deeploy provides organizations with a platform that streamlines AI deployment, improves governance over use cases, guarantees transparency and explainability of AI decisions, and ensures compliance with regulations.

Deeploy's solutions are trusted by industry leaders across banking, insurance, and pensions, including bunq, PGGM, and Brand New Day. Deeploy has also been awarded research grants to advance responsible AI in breakthrough fields like healthcare and has been recognized by Deloitte as one of the most innovative and promising startups in the Netherlands. Headquartered in Utrecht, Deeploy is set to shape the future of AI through innovation, responsibility, and commitment to a positive impact.

Mission Statement

Our mission is to transform the use of machine learning and AI by providing a secure and robust technical foundation that enhances human-AI interaction. We are committed to making AI explainable, accountable, and trustworthy to fulfill the unfulfilled promises of AI and support its role in augmenting human capabilities.

Key Offerings

- **Deployment & Integration:** Easily bring all AI models under one platform.
- **Monitoring & Insights:** Track performance and set alerts.
- **Governance & Compliance:** Govern AI models, maintain audit trails, store model documentation, and track compliance.
- **Explainability (XAI):** Explain predictions, build trust, and gain insights.
