

Maarten Stolk (Co-founder and CEO)

Maarten Stolk is the CEO and Co-Founder of Deeploy, a company dedicated to advancing trustworthy AI adoption. Before founding Deeploy, Maarten worked in the field of data and AI, and co-founded Enjins, helping tech organizations across Europe build and scale AI and ML applications. His background and experience in data and AI, combined with his work in the field, exposed him to the challenges of operationalizing machine learning and navigating the transparency and regulatory challenges of AI. This inspired him to co-found Deeploy, with the mission of gaining control of AI systems in regulated industries.

Maarten holds a Master's and Bachelors degree in Econometrics & Quantitative Finance from Erasmus University Rotterdam and Maastricht University. Passionate about using technology for good, Maarten is dedicated to contributing to a better world by building AI systems that are transparent, safe, and ethical.

Tim Kleinloog (Co-founder and CTO)

Tim Kleinloog is the CTO and Co-Founder of Deeploy, a company dedicated to advancing trustworthy AI adoption. With over 10 years of experience in machine learning and MLOps, Tim brings a strong foundation in technical innovation and leadership to Deeploy. Before co-founding Deeploy, Tim held roles as Lead Machine Learning Engineer at Enjins, and as Senior Advisor in Data Science at EY, where he led data science and engineering projects and teams for both large corporates and scale-ups.

Tim holds a Master's degree in Information Systems and a Bachelor's in Industrial Engineering from Eindhoven University of Technology. He is dedicated to changing AI for good by working with his team to push the boundaries of responsible AI technology.

Bastiaan van de Rakt (Co-founder)

Bastiaan van de Rakt is the Co-Founder of Deeploy, a company dedicated to advancing trustworthy AI adoption. With over 25 years of entrepreneurial experience in machine learning and AI, Bastiaan has co-founded four tech companies, including Deeploy and Enjins, and served as both CEO and CTO, leveraging his deep technical and strategic expertise to drive impactful innovation.

As an advocate for responsible AI, Bastiaan brings a decade of experience as a consultant and advisor, guiding tech companies and VC funds on AI-driven innovations. His work reflects a steadfast commitment to promoting safe, transparent, and ethical AI solutions that benefit society. For the last 7 years, he has been active as an angel investor in AI companies, with a strong focus on the intersection of climate, AI, and deeptech.

Bastiaan holds an M.Sc. in System Engineering and Policy Analysis from TU Delft. Through Deeploy and his broader professional pursuits, he continues to lead efforts to ensure AI technologies are not only transformative but also aligned with societal values and trustworthiness.

Nick Jetten (Co-founder & Advisor)

Nick Jetten is the Co-Founder and Advisor of Deeploy, a company dedicated to advancing trustworthy AI adoption. With over a decade of experience in data science, machine learning, and AI strategy, Nick has a proven track record of delivering impactful AI solutions in both corporate as well as tech industry settings. As the co-founder of Enjins, Nick leads a team of 30+ engineers in building AI solutions for hundreds of tech scaleups across Europe. These experiences highlighted the critical need for Responsible AI practices, inspiring him to co-found Deeploy to help organizations deploy AI transparently and ethically.

Before founding Enjins and Deeploy, Nick worked in the field of data science in diverse roles such as product owner, project manager, and team lead. He holds both a BSc and MSc in Econometrics from the University of Groningen.
